Subject: Two Technical Assistance Reports - NYSDEC and NJDEP
Attachments: NYSDEC St Gobain Report - Follow-Up - Aug 14.docx; NJDEP Report #8- NTA_Water_10Aug2020.docx

Hello Bruce –

Please find attached two reports in response to requests for technical assistance from states in Region 2.

The first attached report to NYSDEC follows-up on the December 2, 2019 report that we submitted to NYSDEC that provided qualitative analyses of PFAS and VOC from a PFTE sintering process at the Saint Gobain facility in Hoosick Falls. This report provides quantitative estimates of TFE and VOC samples collected in Summa cannisters.

The second attached report to NJDEP is our 8th report in response to our collaborative efforts to analyze PFAS in environmental media. This report provides results of non-targeted analyses (NTA) of groundwater and non-tidal/tidal surface water samples.

I have shared these reports with R2 for their awareness and I plan to share the NJDEP report with OW and the NYSDEC report with OAR – for their awareness.

I will let you know if I hear anything from R2, OW, and/or OAR. I hopeful to formally submit these next week.

Let me know if you have any questions.
